(+1) 857.600.1864

You are invited to take part in a research project. This project is being led by researchers at MGH Institute of Health Professions. The goals of this project are to a) evaluate the effectiveness of a workshop on the use of ChatGPT and similar artificial intelligence (AI) technologies in educational settings and b) gather information to put into an open-source repository that educators can refer to regarding the use of Chatbots, ChatGPT, and related AI tools within educational settings.

Participating in this research project is voluntary, and you may choose to not take part or withdraw at any time. If you decide to take part, you will be asked to:

1. Fill out a 5-minute pre-workshop informational survey.
2. Participate in a one-hour workshop during which you will be asked to a) reflect upon the possible use of Chat GPT by your students, b) plan your own responses/policies regarding the use of Chat GPT by your students, c) contribute any text you write to an open-source repository. All of these activities are optional (not required).
3. Fill out a 5-minute post-workshop feedback survey.

Your responses to pre-workshop survey questions will be kept confidential. None of your identifying information will be collected on the post-workshop survey, so your post-workshop survey information will be completely anonymous. Data will be stored in the Partners/MGB REDCap system or on Partners/MGB-issued computers.

This study has minimal risk to you. Potential benefits of your participation include a) increased comfort and experience with the uses of Chat GPT in educational settings and b) better preparation for the use of Chat GPT and related artificial intelligence technologies by your students in your own teaching.

You are welcome to withdraw from the study at any time by informing any study staff member. You are also welcome to participate in the workshop without filling out the surveys and/or without having your survey responses included in the data used for this study.

Contact Anshul Kumar at (+1) 857.600.1864 if you have questions about the research. If you have questions about your rights as a research subject, you may contact staff of the Mass General Brigham IRB at (+1) 857-282-1900 or [irb@partners.org](mailto:irb@partners.org).
